

WM EarthCare™ Mulch

Our mulch is 100% recycled, clean, untreated lumber, coarsely ground to two inches at a facility in the Bay Area. Available in six colors which is safe for children and animals, WMEarthcare Mulch is guaranteed to retain its color for one year.

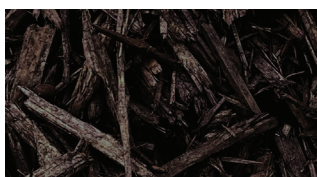

Color Options

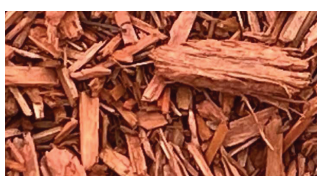

Muir Woods Brown evokes the essence of a forest floor with its rich earthy color.

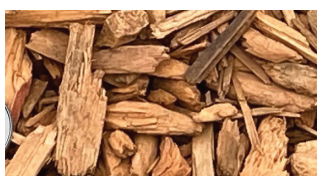

Mission Mahogany creates the appearance of redwood bark without fading.

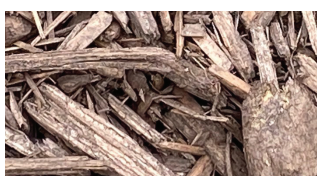

Mt. Diablo Black captures the sun's warmth to raise soil temperature by as much as 10° and helps protect sensitive plants in winter.

Golden Gate Red stimulates vegetation by reflecting a favorable light wavelength associated with plant growth.

California Gold enriches a garden by reflecting the sun's rays in summer and retaining the soil's moisture.

Monterey Dune Natural fades from yellow to a wood color, producing a natural aesthetic.

Description

Feed Stock: 100% recycled, clean, untreated dimensional lumber.

Particle Size: Material is ground to 2" minus.

Color: Heartland Enriched Colorants by Amerimulch are comprised of mostly pigments (40-70%) and water (15-30%). The remaining ingredients are Humectants, Resins and other additives that are in small quantities and considered safe for handling.

Texture: Shredded organic material, fibrous, arbor mulch like appearance.

Recommended Application:

Mulch sustains soil by retaining moisture, regulating soil temperature, preventing erosion, deterring weeds, and reducing compaction. Apply three to four inches of mulch for best results. (One cubic yard covers 108 sf) Replenish annually to compensate for settlement and to brighten color aesthetics.

How to Order WM EarthCare Mulch

Available in bulk. Contact and WM EarthCare specialist below to begin a consultation so we can make sure you receive exactly what you need. Don't forget to ask about our other products, including compost, soil blends and hardscape.
